SUMMARY

Results-driven Data Analyst with hands-on experience in Python, SQL, Power BI, and Excel, delivering end-to-end data solutions from data collection to actionable insights. Proven ability to translate complex datasets into actionable business insights across supply chain, e-commerce, HR, and public health. Background in frontend development with React.js, JavaScript, HTML5, and CSS3, which strengthens UI thinking and stakeholder communication.

EXPERIENCE

CodeAlpha

May 2026 - Present

Data Analytics Intern | Remote

- â€¢ Scraped and collected custom datasets from public web pages using Python BeautifulSoup, handling HTML parsing and navigation.
- â€¢ Performed structured Exploratory Data Analysis on collected datasets, exploring variable distributions, identified trends, patterns, and outliers.
- â€¢ Transformed raw data into compelling visual narratives using Matplotlib and Seaborn, designed charts and dashboards that enhanced data storytelling.

NUEXSOLUTIONS (Pvt) Ltd

Sep 2025 - Mar 2026

Frontend Web Developer | Pakistan (Hybrid)

- â€¢ Developed and maintained responsive web interfaces using React.js, JavaScript, HTML5, and CSS3 for client-facing products.
- â€¢ Collaborated with product and design teams to translate business requirements into functional UI components, gaining direct insight into user needs.
- â€¢ Applied analytical thinking to identify UI performance bottlenecks, optimizing component rendering logic and improving page load times.
- â€¢ Built cross-functional communication skills working alongside backend developers and designers, directly transferable to data analysis.

PROJECTS

DataCo Smart Supply Chain Analytics | Python + SQL + Power BI | Flagship

- â€¢ Problem: Supply chain organization lacked actionable visibility into sales performance, delivery efficiency, shipping operations, and customer satisfaction.
- â€¢ Approach: Performed full EDA and feature engineering in Python, imported into MSSQL and solved 25+ business questions using SQL.
- â€¢ Outcome: Identified Fan Shop as top revenue driver at 50% of total sales; flagged Standard Class responsible for 41% late-delivery rate.

OLIST E-Commerce Full Analysis | Python + SQL + Power BI | Flagship

- â€¢ Problem: Brazilian e-commerce platform needed visibility into seller performance, delivery efficiency, and customer satisfaction across regions.
- â€¢ Approach: Cleaned and merged 9 relational datasets in Python, wrote 20+ SQL business queries, and built an interactive Power BI dashboard.
- â€¢ Outcome: Identified top 5 revenue-driving product categories, flagged 12% late-delivery rate in specific regions, and delivered actionable insights.

Customer Behavior Analysis | Python + SQL + Power BI

- â€¢ Problem: Lack of visibility into customer segments and purchasing behavior in raw transactional data.
- â€¢ Approach: Cleaned 50,000+ records using Python, wrote 15+ SQL queries for RFM segmentation and cohort analysis, and built an interactive dashboard.
- â€¢ Outcome: Discovered 3 distinct customer segments; high-value segment (18% of users) drove 62% of revenue enabling targeted marketing.

EDUCATION

Khwaja Fareed University of Engineering and Information Technology (KFUEIT)

Bachelor of Science in Artificial Intelligence

Rahim Yar Khan, Pakistan | CGPA: 3.80 / 4.00

Relevant Coursework: Data Structures, Algorithms, Database Systems, Machine Learning, Data Analytics, Statistics, Software Engineering

TECHNICAL SKILLS

Python â€¢ NumPy â€¢ Pandas â€¢ Matplotlib â€¢ EDA â€¢ SQL / MSSQL â€¢ Data Modeling â€¢ RFM Segmentation â€¢ Jupyter â€¢ Streamlit â€¢ Excel â€¢ Power BI â€¢ DAX â€¢ Cohort Analysis â€¢ Git / GitHub â€¢ VS Code â€¢ JavaScript â€¢ React JS â€¢ HTML5
